

# RUBBER MOULDS

The Shamrock Team has many years experience with the manufacture of Rubber Mould Tools, especially for the following industrial groups:

- Dairy
- Mining
- Automotive & Marine
- Civil Construction
- Original Equipment Manufacturers e.g. Whiteware Manufacturers

Examples of Mouldings include:

- Milking Machine Liners & Animal Feeder Teats
- Abrasion Resistant Liner Pads
- Engine & Motor Mounts
- Numerous Industrial Bushes, Glands, Grommets, Washers, Plugs & Seals
- Vibration Isolators & Expansion Pads

Most Moulds have an assembled mass of up to 500kg although larger Moulds have also been undertaken.

## FULL CAD/CAM FACILITY

Our full CAD/CAM capability means that, from your Tooling concept, we can comprehensively design then accurately and cost effectively manufacture the finished Tool.

Accordingly, Rubber Mould Tools may be custom designed by Shamrock or produced from client supplied drawings or CAD/CAM files. 2D and 3D design files can be sent and received via email or disk, allowing us to develop and confirm the Tool design in consultation with you. Alternatively, your finished designs may be received electronically and entered directly into manufacture for exact and cost effective production.

## QUALITY ASSURED

Throughout manufacture, specification compliance is supported by Shamrock's ISO based Quality Management System to provide a quality assured product.

So if you require quality Rubber Moulds, accompanied by a professional service, call us at Shamrock Industries for a no obligation discussion.
